

So smart it's simple. Introducing the Fluidmaster® Access Panel.

HERE'S THE ACCESS PANEL THAT'S STREAM-LINED IN EVERY WAY. Easy to install. Easy to use. Easy to conceal.

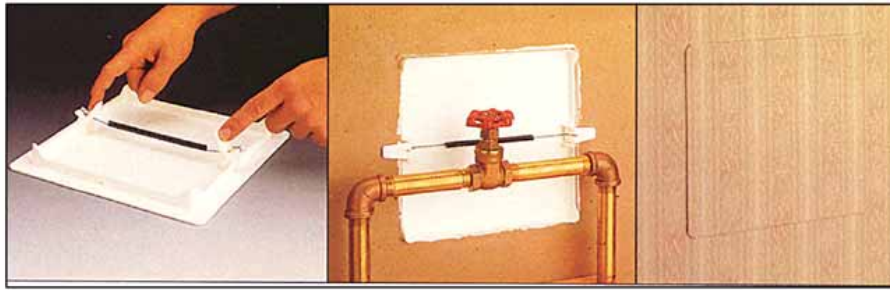

The convenience of access panels is an easy sale with Fluidmaster's unique design. Its patented, spring-loaded mechanism permits frameless mounting from the outside.

No other access panel is easier or less expensive to install. Measure. Cut. Then pop in the panel. It's really that fast. The instruction sheet even doubles as a template. No lumber, adhesive or measuring tape required.

Built to last and constructed from high impact, non-yellowing polystyrene, every access panel is backed by Fluidmaster's one year guarantee and offers all these DIY advantages:

Many Uses— Great for fast or periodic access to household plumbing, wiring and security systems; in-wall cables for computers, stereos and televisions; pipes and valves behind spas and saunas.

Low Cost— No other access panel is priced lower.

Pull spring-loaded clips into vertical position. Clips clamp against wall when panel is inserted.

Eliminates Costly Wall Damage—

No more cutting, patching or repainting each time an in-wall repair or modification is necessary.

Easily Concealed—

Clean lines and rounded corners enhance the simple, one-piece design. The lightly textured surface readily accepts paint or wallpaper.

Simple to Use—

Lightweight panel pops right in or out of position. No bothering with screws, latches or fasteners.

Two Sizes—

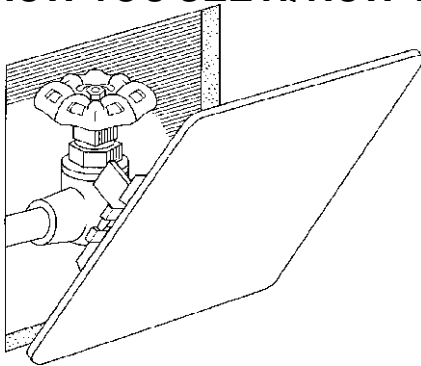

A choice of 8"x 8" or 14"x 14" suits almost any application. Works in walls or ceilings up to 3/4" thick.
