MONITORING AND PROTECTING YOUR HOME FROM WATER DAMAGE

Flo® Smart Water Monitor and Shutoff

The Flo® Smart Water Monitor and Shutoff is a game-changing leak detection and water monitoring device that detects leaks anywhere in the home. This device can automatically turn off the water to the home if a leak or risk is detected, with the ability to start and stop water flow from your smartphone. It also provides real-time information on water usage in your home.

MOEN
SMART WATER NETWORK

Welcome to the home's first Smart Water Network – an ecosystem of smart water products integrated by the Moen Smart Water App. As part of this network, Smart Water Security products monitor for water leaks, collect water usage data, shut off the water supply when necessary and more.

WHY? *The Flo Smart Water Monitor and Shutoff is the first line of defense for homeowners when it comes to leaks and water damage inside the home.*

Moen received the highest numerical score in the proprietary Lifestory Research 2016-2022 America's Most Trusted® Faucet studies. Study results are based on experiences and perceptions of people surveyed. Your experiences may vary. Visit www.lifestoryresearch.com.

What is the Flo® Smart Water Monitor and Shutoff?

Installed on the home's main water supply line, the Flo® Smart Water Monitor and Shutoff continuously monitors for leaks, as well as water pressure, flow rate and area temperatures and notifies you of any abnormalities in real time through the Moen Smart Water App.

Why do homeowners need one?

Visibility and Reassurance: Many homeowners may not know when they have a leak in their water lines. Upon installation of the Moen Smart Water Monitor and Shutoff, 60% of homeowners immediately discover a leak they didn't know about.*

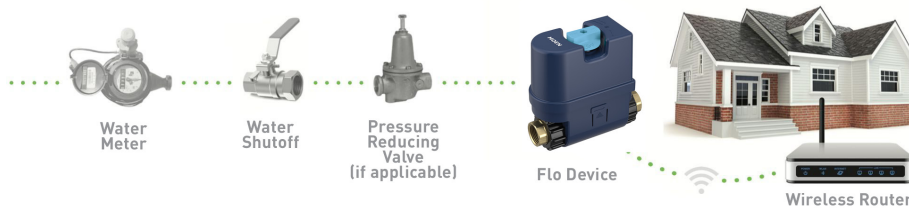

Proactive Protection: The Flo Smart Water Monitor and Shutoff mitigates the risk of water damage by giving homeowners the opportunity to proactively address water leaks in the home before there is significant damage.

How does it work?

With proprietary MicroLeak™ technology, the Flo Smart Water Monitor and Shutoff runs daily Health Tests to help detect leaks, including very small leaks or leaks behind walls or other hidden areas. It can also detect if a fixture has been left on or if temperatures are near freezing.

Through the Moen Smart Water App, you can access this information in real time and opt to shut off the main water supply remotely. The device will also automatically shutoff the water if you're unable to respond to prevent damage.

The Flo Smart Water Monitor and Shutoff also monitors daily water usage, enabling you to compare water usage to historical patterns and set and monitor conservation goals.

KEY BENEFITS

24/7 Protection – The Flo Smart Water Monitor and Shutoff monitors for water leaks around the clock and alerts you to any abnormalities, including abnormal pressure or fixtures that have been left on.

Remote Shutoff – Through the Moen Smart Water App, you can shut off your water remotely. Your water will also automatically shut off if you do not respond to notifications to proactively prevent water damage.

Water Usage Monitoring – Through the Moen Smart Water App, you can monitor water usage in your home, compare it to historical usage patterns, and set and monitor conservation goals.

Customizable Notifications – The Moen Smart Water App allows you to customize the way you are notified in case of a leak or other water event – by text, phone call, email and/or through the app itself.

Extra Insurance – For \$5 per month and no long-term contract, you can subscribe to FloProtect™, which covers your water damage deductible up to \$5,000. It also extends the one-year guarantee on your Flo Smart Water Monitor and Shutoff by four more years, for a total of five years.
