

TRIO® CAST IRON BOILERS

The Best Value in the Heating Industry

CAST IRON BOILERS

When it comes to selecting a heating system, the

Comfort. Reliability.

TRIO® is a heating system that combines all three benefits and is the result of European design, American engineering and 50 years of manufacturing expertise.

TRIO is a proprietary design manufactured by PurePro® and distributed exclusively through F.W. Webb Company, the Northeast's largest plumbing and heating supplier. This means every homeowner who selects TRIO enjoys a unique value backed by a company that has a 150-year history of product excellence and service.

What Sets TRIO Apart?

The TRIO heating system is not a conventional boiler. It's a high-efficiency, three-pass, low mass boiler. This unique design allows the TRIO boiler to heat up in half the time of a conventional boiler... saving fuel, time and money. In addition to eliminating fuel waste and optimizing operating efficiency, TRIO's proven recirculating flue gas technology reduces emissions and your carbon footprint.

$$\begin{array}{l} \text{Optimum} \\ \text{System} \\ \text{Efficiency} \end{array} + \begin{array}{l} \text{Optimum} \\ \text{Fuel} \\ \text{Efficiency} \end{array} = \begin{array}{l} \text{Lower} \\ \text{Cost} \end{array}$$

This simple equation, along with the reputation of F.W. Webb, the company standing behind TRIO, provides both contractors and homeowners with the industry's best heating system.

Three things are key.

Quality. Efficiency.

CAST IRON BOILERS

TRIO is the Top Choice

Superior construction, ease of installation and design features that make maintenance and repair fast and easy are all reasons that thousands of contractors and homeowners have come to rely on TRIO for superior heating.

Best Warranty in the Heating Industry

Only TRIO offers a full lifetime warranty on the cast iron heat exchanger AND allows the warranty to be transferred to a new homeowner for the first 20 years it's in use. Real estate agents, building inspectors and home buyers see this as a great selling feature when selling a home.

Superior Construction

The TRIO boiler is constructed of silicon-infused cast iron, which offers superior elasticity and unparalleled performance in a variety of temperature swings. This means the boiler will perform better and last longer.

TRIO is Fuel Neutral & Fuel Smart

The TRIO boiler can be outfitted to run on oil, natural gas or propane. If the home's fuel source ever changes, you can simply replace the burner without voiding the boiler warranty. In addition, a Hydrostat fuel smart control is a standard feature on all TRIO systems, providing a seamless way to lower boiler temperatures to save fuel without sacrificing comfort.

Energy Star Rating

TRIO boilers are Energy Star rated up to 87%, meeting energy efficiency rates that qualify for oil boiler rebates in some states.

Maximize System Efficiency by Adding the Energy Manager Plus II

Want to optimize system efficiency even more? The Energy Manager Plus II provides an electronic brain for the heating system allowing you to deliver just the right heat to each area of your home, only when it's needed. By operating circulators and/or zone valves, Energy Manager Plus II makes your heating system more efficient and cost-effective.

SPECIFICATIONS & BURNER OPTIONS

Boiler Model	Fuel	INPUT (BTU/hr)	NET IBR (BTU/hr)	AFUE Rating
P3	OIL	105,000	79,000	85.5
	GAS	90,000	66,000	85.0
P3ES*	OIL	98,000	75,000	87.0 with Energy Star Kit 705813
P4	OIL	140,000	106,000	86.5
	GAS	115,000	85,000	85.1
P4ES*	OIL	133,000	101,000	87.0 with Energy Star Kit 705814
P5	OIL	175,000	133,000	86.9
	GAS	150,000	110,000	85.1
P5ES*	OIL	154,000	117,000	87.0 with Energy Star Kit 705815
P6	OIL	210,000	160,000	86.9
P7	OIL	245,000	181,000	85.0
P8	OIL	280,000	208,000	85.1

* Energy Star Rated

The TRIO is compatible with several popular burners including Riello, Beckett and Carlin.

Consider Adding a PurePro Hot Water Heater

Your TRIO boiler can also be the heat source for your home's hot water when combined with a PurePro water heater. When combined, the boiler fires only when necessary, transferring heat to the water through a highly efficient heat exchanger. The well-designed digital control means homeowners save up to 10% on fuel and enjoy endless hot water. Homeowners can select from a complete line of 41- and 80-gallon indirect water heaters. PurePro offers the Plug 'n Go PLUS, the only pre-piped, pre-wired, packaged indirect water heaters in the industry.
