

Energy Manager PRO 6000C

Energy Manager PRO 6000Z

Features

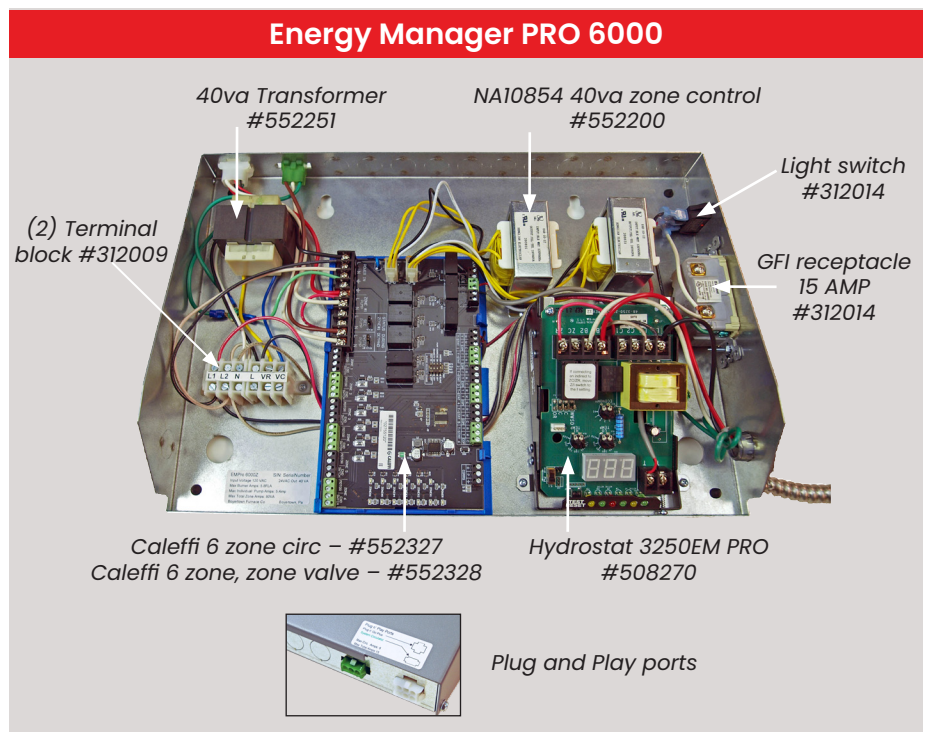

- Plug 'n' Play Control to include 6 zone relay, you choose either pumps or zone valves
- Hydrolevel 3250 Aquastat pre-wired
- Boiler temperature display and low water cutoff indicator lights
- Single 110V power supply powers everything in the panel
- Compatible with Wi-Fi Thermostats
- Additional 24V power source
- Built from standard off the shelf components
- Ability to provide indoor reset or outdoor reset
- Illuminated power switch
- 120V GFI Protected Outlet
- Direct connect molex connector for Plug N Go Indirect water heater
- Color coded molex connector for either primary pump or system pump when using zone valves
- LED zone control lights to easily read what zones are being used
- Ability to add additional zones with standard Caleffi relay

The PurePro® Energy Manager PRO 6000 integrates a 6-zone relay board, boiler aquastat, low water cutoff and boiler reset. This all-in-one, simple to use control comes completely prewired.

The PurePro Energy Manager PRO 6000 features a 6 zone Caleffi Circulator or Zone valve relay board and the Hydrolevel 3250 HydroStat®. The HydroStat 3250 uses Thermal Targeting™ to match the heat load and boiler water temperature. To further enhance fuel efficiency, the fuel smart HydroStat is also equipped with a thermal pre-purge feature. When activated, the control will purge standing heat in the boiler at the start of any thermostat call, supplying the free latent energy to the heating zone that is calling.

- An additional Caleffi relay can be added externally for either zone valves or circulators if there is a need beyond the 6 zones included in the Energy Manager PRO 6000
 - Hydrolevel 3250 control LED status lights: Boiler temperature display, low-water cutoff
 - Auto test capabilities for ease of troubleshooting and system purging
- You can select your Energy Manager PRO 6000 based on using pumps (6000C) or zone valves (6000Z), so your system is covered either way.

Optional Packages

System Circulator Packages for use with Energy Manager PRO6000

PRO707630

- For zone valve operation or primary/secondary piping
- Taco 007, includes flanges
- 9' long whip with Quick Connect feature

PRO707635

- For zone valve operation or primary/secondary piping
- Taco 007e ECM High Efficiency Circulator, includes flanges
- 9' long whip with Quick Connect feature
